

Your reliable supplier for precious metal coin blanks.

Our precious metal blanks for coins and medals are supplied to major mints worldwide. The quality and unique variety of metals and alloys, which can be manufactured to customer's specifications, are the basis for the strong international reputation which Sempsa Jp has gained over the years.

By our expertise in casting, rolling and blanking, together with high quality control procedures, we are able to satisfy your individual needs. Choose from an impressive diversity of shapes or sizes, alloys and metals (gold, silver, platinum and palladium), either rimmed or unrimmed, with or without edges.

Furthermore, our production is not limited to these. For non-standard blank requirements, tooling can be produced as required. Bright annealed, rolled or burnished: whatever your needs in terms of finishing will be, Sempsa JP offers the right solution, ready to strike.

All blanks are accompanied by a quality control certificate and histograms detailing weight, dimensions and mechanical characteristics.

We specialize in the production of bullion coins, but our abilities go beyond that – we can fulfil all of your requests for special and unique collector coins and medals
